

SMC 2016

IEEE INTERNATIONAL CONFERENCE ON
SYSTEMS, MAN, AND CYBERNETICS
OCTOBER 9-12

Call for Papers Special Session on Big Data Analytics

Since we are in the era of big data, large volumes of data streams are continuously generated from sensors, social media, the Internet, etc. In many different environments, it is essential that these data can be analysed in real time in order to extract useful information, evaluate it and take appropriate decisions. Big data analytics can be defined as the process to automatically extract knowledge from those huge volumes of data.

This special session provides a platform to present different research in the area of big data analytics and its use in any kind of environment.

Important Dates:

Submission deadline: **April 15, 2016**
Acceptance notification: **May 25, 2016**
Final Paper Upload: **July 9, 2016**
Conference Date: **October 9-12, 2016**

Organizers:

- José Antonio Iglesias (jiglesia@inf.uc3m.es)
- Germán Gutierrez (ggutierr@inf.uc3m.es)
- Agapito Ledezma (ledezma@inf.uc3m.es)
- Araceli Sanchis (masm@inf.uc3m.es)
- Plamen Angelov (p.angelov@lancaster.ac.uk)
