Conference Open

9-12 October, 2016

Conference Scope Information and communication technologies have been providing an effective network infrastructure and development platform for logistics and service operations. To meet the needs of consumers and to promote core competences, many firms have been developing new technologies and services. With the economic globalization, there have been many new phenomena, new situations and new challenges in the industries in each country. Thus there is a necessity for academics to conduct in-depth research on these topics.

The special session will inherit the current research of international academic community on the emerging fields of logistics, informatics, service sciences and industrial security system, which not only focus on the theoretic developments, but also pay attention to practical applications of the methods and techniques. Through this conference, participants will share the latest research findings and practical experiences and exchange their innovative ideas.

Areas of Interest The topics of interest include, but are not limited to:

- ◆ **Logistics Management:** ●Logistics systems ●Logistics cybernetics ●Logistics informatics ●Logistics and supply chain management ●Logistics Services Strategy ●Supply Chain Management ●Low-Carbon and Logistics ●Low-Carbon Supply Chain ●Logistics Alliance ●International Logistics ●Regional Logistics ●Emergency Logistics ●Internet of Things and Logistics Services ●Logistics Service System Optimization ●Logistics Industry and Policy
- ◆ **Information Management:** ●ERP ●E-commerce and E-government ●Enterprises informatics ●Information and communication technology ●Internet of things ●Internet technology and applications ●Accounting Information System ●Business Intelligence and Business Analysis ●Customer Relations Management ●Digital Enterprise Infrastructure ●Enterprise Commercial Intelligence ●Wireless Communications and Mobile Business ●Enterprise Information Resources Management ●Sensor Network and Internet of Things ●RFID Technology and Application ●Pervasive Computing and Intelligent Living Space ●Cloud Computing Theories and Technologies ●Collaborative E-commerce Mechanism and Technology ●Network Marketing Strategy and Application ●Electronic Commerce Application and Benefit Appraisal ●Network Transaction, Trust Mechanism and Information Security ●Electronic Market and Intervening Mechanism ●Knowledge Management and Knowledge Sharing ●Organization Semiotics and Informatization ●IT Project Management
