

2016 IEEE International Conference on Systems, Man, and Cybernetics (SMC 2016)

October 9-12 2016  
Budapest, Hungary

---

## The 2016 IEEE International Conference on Systems, Man, and Cybernetics

### Special Session on “Fractional order systems: theory, design and applications”

Organizers:

**Dr. Eng. Cristina I. Muresan**

Technical University of Cluj-Napoca, Department of Automatic Control,  
26-28 Gh. Baritiu Str., 400027 Cluj-Napoca, Romania  
Cristina.Muresan@aut.utcluj.ro

**Dr. Dana Copot**

Ghent University, Department of Electrical energy, Systems and Automation  
Technologiepark 914, 2<sup>nd</sup> floor, 9052, Ghent, Belgium  
Dana.Copot@UGent.be

Fractional-order systems have lately been attracting significant attention and gaining more acceptance as generalizations to classical integer-order systems. Fractional order systems can be applied in control applications and systems modeling, and their effectiveness has been proven in many theoretical works and simulation routines. Further steps have been taken and fractional order systems have been applied on real applications in fields such as: mechatronics, process control; biomedical applications; etc. The aim of this special session is to bring together researchers, and not only, to present their latest results, ideas related to the design and/or implementation of fractional order systems with possible utilization in innovative areas.

Deadlines:

Abstract submission: February 20, 2016

Paper submission: *April 15, 2016*

Notification of acceptance: *May 25, 2016*

Camera-ready papers: *July 9, 2016*

More information on registration and paper submission available at:  
<http://www.smc2016.org/>

Prospective authors are required to submit the title of the paper, along with the authors list to one of the Special Session organizers, before February 20, 2016.
