The special session is submitted to section:
Junior Cybernetics

Introduction/Call for Papers

This special session provides an opportunity for young researchers, but not only, international specialists and engineers to present and observe the latest research, results, and ideas in the areas of cybernetics, especially biomedical engineering and robotics. Moreover, this special session aims to gather and discuss efficient techniques and methods able to cope with the current challenges in the field of cybernetics. Hence, this is a good channel for young researchers to make their work visible and to create a network which will further give them the change to collaborate with other research groups.

Topics:

Topics include (but not limited to):
Cybernetics for informatics; Bioinformatics; Agent-based modeling; Medical information; Image processing; Robotics systems; and other related topics.

Deadlines:

Paper submission: *April 15, 2016*
Notification of acceptance: *May 25, 2016*
Camera-ready papers: *July 9, 2016*

Manuscripts for a Special Session should **NOT** be submitted in duplication to any other regular or special sessions and should be submitted to SMC 2016 main conference online submission system on SMC 2016 conference website (smc2016.org)

All submitted papers of Special Sessions have to undergo the same review process as the regular papers. The technical reviewers for each Special Session paper will be members of the SMC Junior 2016 Program Committee and qualified peer-reviewers to be nominated by the Special Session organizers.
