

Call for Papers for special session on Grey System Theory and Applications at the IEEE SMC 2016, October 9-12, 2016 Budapest

<http://www.smc2016.org/>

We are organizing a special session on Grey System: Theory and Applications at the IEEE SMC 2016. Our special session has been approved by SMC2016's program committee. The purpose of this special session is to promote, exchange, and display research results of Grey Systems theory and its various applications.

Some typical research areas that will be discussed in this special session include (but are not limited to) the following:

- Concepts and Principles of Grey System
- Grey Sets, Grey Numbers and its Operation
- Grey Equation and Grey Matrix
- Sequence Operator and Grey Data Mining
- Grey Incidence Analysis Models
- Clustering Evaluation Models
- Grey Input-output Models
- Grey Forecasting Models
- Grey Decision-Making
- Grey Control
- Grey Simulation
- Applied Studies

- Other Relevant Topics

Prospective authors are invited to submit your full-length papers electronically through the conference website. Each paper should be concise with sufficient detail and references to allow critical review. Papers will be reviewed by at least two referees for technical merit and content. Accepted papers will appear in the conference proceedings only if one of the authors is registered for the conference and presents the paper at the conference.

Important Dates

April 15, 2016
